Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because inline 1, "The invention provides" should be deleted. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 6-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

a. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Cataldi et al. Cataldi et al disclose a pair of portions having annular parts (fig. 1) and a pair of gripped parts connected to the annular parts, a stretchable connection member, wristband parts. Regarding the language "to be worn on foreparts of limbs", "so as to be gripped between fingers", "to be worn on both wrists and ", "so as to be grasped with hands", "so that a connected point of the connection member with each of the wristband parts can move in a circumferential direction", and claims 4-5 language because the recitations are purely functional in nature and do not recite any structure.

b. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 61 73361. The reference discloses in the drawings a pair of portions having annular parts (fig. 1) and a pair of gripped parts connected to the annular parts, a stretchable connection member, wristband parts. Regarding the language "to be worn on foreparts of limbs", "so as to be gripped between fingers", "to be worn on both wrists and ", "so as to be grasped with hands", "so that a connected point of the connection member with each of the wristband parts can move in a circumferential direction", and claims 4-5 language because the recitations are purely functional in nature and do not recite any structure.

c. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 51-36324. The reference discloses a pair of portions having annular parts (fig. 1) and a pair of gripped parts connected to the annular parts, a stretchable connection member, wristband parts. Regarding the language "to be worn on

foreparts of limbs", "so as to be gripped between fingers", "to be worn on both wrists and ", "so as to be grasped with hands", "so that a connected point of the connection member with each of the wristband parts can move in a circumferential direction", and claims 4-5 language because the recitations are purely functional in nature and do not recite any structure.

d. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 6-29530. The reference disclose a pair of portions having annular parts (fig. 1) and a pair of gripped parts connected to the annular parts, a stretchable connection member, wristband parts. Regarding the language "to be worn on foreparts of limbs", "so as to be gripped between fingers", "to be worn on both wrists and ", "so as to be grasped with hands", "so that a connected point of the connection member with each of the wristband parts can move in a circumferential direction", and claims 4-5 language because the recitations are purely functional in nature and do not recite any structure.
